DETAILED ACTION

Allowable Subject Matter

The indicated allowability of claims 21, 26 and 27 is withdrawn in view of the rejection herein below.

Renumbering of the Claims

Applicant's claims filed on 07 June 2005, 11 August 2005, and 04 August 2008 omitted claim 35 from the claim listings. All of the claims presented in a claim listing shall be presented in ascending numerical order. See 37 CFR § 1.121. Therefore, claims 36 and 37 are renumbered herein as claims 35 and 36, respectively.

Status of the Claims

Claims 21-35 are pending in the present application and are examined herein on the merits for patentability.

Withdrawn Rejections

Rejections and/or objections not reiterated from the previous Office Action are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set of rejections and/or objections presently being applied to the instant application.

Claim Rejections - 35 USC § 102

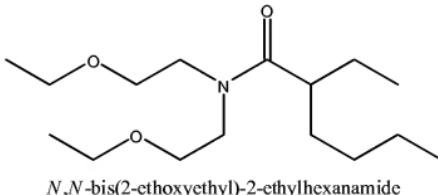

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 21, 23, 24, 26 and 27 are rejected under 35 U.S.C. 102(b) as being anticipated by Mod et al. (US 3,309,333; US 3,515,754; US 3,519,661; US 3,538,123; and US 3,584,030).

Mod et al. disclose N,N-bis(2-ethoxy)-2-ethylhexanamide (depicted below wherein R= CH(C₂ alkyl)(C₄ alkyl); X and Y= C₂ alkyl; and R1 and R2= C₂ alkyl) prepared by reacting di(2-ethoxyethyl)amine and 2-ethylhexanoyl chloride (Example 4 in all patents listed above). Mod et al. disclose the compound eluted with a 1:1 ethanol-benzene mixture (Example 4). The instant specification lists benzene as a suitable diluents (pg. 6, ln. 1-11), and states that the compounds are used in diluted form with simple alcohols, such as ethanol (pg. 11, ln. 16-20).

It is noted that the recitation of the intended use "vermin-repellent" has not been given patentable weight to distinguish over Mod et al. because the intended use of the

claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963). Since Mod et al. discloses compounds that are the same as those claimed, in the absence of evidence to the contrary they would be capable of performing the intended use, as claimed.

It is also noted that Mod et al. does not explicitly disclose that the composition is a "pour-on" formulation. However, the composition comprises N,N-bis(2-ethoxy)-2-ethylhexanamide in a 1:1 ethanol-benzene mixture, which would inherently be pourable.

Response to Arguments

Applicants argue on page 6 that they amended claims 23 and 24 to depend from allowed claim 21, which was amended to dependent form, thus overcoming the rejection. However, claim 21 was inadvertently omitted from the previous rejection. As can be clearly seen in the above rejection, Mod et al. discloses a composition comprising N,N-bis(2-ethoxy)-2-ethylhexanamide in a 1:1 mixture of ethanol and benzene. Therefore, Mod et al. clearly anticipate claims 21, 23, 24, 26 and 27.

Allowable Subject Matter

Claims 22, 25 and 28 are objected to as being dependent upon a rejected base claim (claim 21), but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 29-35 are allowed.
